

Work Based Learning: Teachers in Industry

Project Outline

- Summer internship project
- Indiana Career and Technical Education (CTE) teachers
- Apply the principles of Work Based Learning in a hands-on environment
- Build strong partnerships with industry in local communities

Benefits to Teachers

- Summer Internship Experience in a relevant industry
- Earn a stipend for interning in your industry and developing instructional resources
- Create lesson plans and presentations to share with other CTE teachers locally and state-wide
- Build partnerships with industries in your local community

Benefits to Industry Partners

- A professional, local CTE teacher available to intern and assist with projects in your industry
- Stipend for intern paid from the Indiana Department of Education.
- Help to create a future network of potential employees and professionals
- Build partnerships with local schools, CTE programs, teachers, and eventually students.

Benefits to Career & Tech Ed

- Helps teachers understand the principles of Work Based Learning
- Lesson Plans and presentations created to share as resources with other CTE teachers
- Established partnerships for future Work Based Learning experiences for students

Participants

- 25 participants in 2016, 21 communities across the state
- 20 participants in 2015

Internship Experience Takeaways...

- Integral part of career pathway
- Begin recruitment early (8th grade)
- Tie into other career interests
- Use industry partnerships – they will support you!
- Involves other classes outside career pathway
- Work Based Learning essential component
 - > General Ag Summer Internship following Junior year
 - > Senior Specialized Ag Internship in targeted area of interest
- FFA Career Development Events provide meaningful experiences that support Work Based Learning and excellent resume/application building.
- Supervised Agriculture Experience project ties to career path
